[Watch the 2026 Demo Reel](#)

Each project entry includes a clickable link to the matching portfolio section.

PROJECT BREAKDOWN

Selected Work

01

Motion Capture

PROJECT TYPE Motion capture and character animation

SOFTWARE Vicon Blade, MotionBuilder, and Maya

Created a motion-capture animation workflow using Vicon Blade for capture, MotionBuilder for motion processing, and Maya for the final character animation and scene work.

02

Procedural Model Building

PROJECT TYPE Procedural modeling

SOFTWARE Houdini

Built a procedural model in Houdini using a node-based workflow that allows the form and structure to be generated and adjusted through parameters.

03

Procedural Flower Field

PROJECT TYPE Procedural environment and modeling

SOFTWARE Houdini

Created a procedural flower field in Houdini, including the flowers, petal distribution, terrain, grass, variation, and large-scale scattering across the environment.

PROJECT BREAKDOWN

Selected Work, continued

04

The Princess Diaries - Clean Plate

PROJECT TYPE Compositing and clean-plate work

SOFTWARE Nuke

Created a clean plate in Nuke by removing unwanted visual elements and rebuilding the missing background so the final shot appears natural and seamless.

05

The Dreamer's Guide

PROJECT TYPE Compositing and real-time environment work

SOFTWARE Nuke and Unreal Engine

Developed visual-effects work for The Dreamer's Guide using Unreal Engine for the digital environment and Nuke for compositing the final imagery into a cohesive dream world.
